

Now Available: Electronically Scored Single Targets

On your home range or on your land...

We've taken the work out of long range target shooting while increasing safety. Spend your time focusing on the target instead of walking to the target!

Receive effortless feedback as shots appear in real time at your firing point on your Microsoft Windows™-based PC or laptop.

CMP Targets™ is the exclusive North American distributor of KTS targets, the same system being used on well over 250 outdoor rifle and pistol targets at the Civilian Marksmanship Program's 500 acre Talladega Marksmanship Park in Alabama and on Camp Perry's Petrarca Range in Ohio.

For sales and technical information, contact: Bryan Parris at bparris@TheCMP.org or call 256-835-8455, Ext. 421.

Single Lane Price:
\$2,850*

**Single lane package includes target, software and cabling up to 300 yards, for use with your PC or laptop.*
