

PELLET DISCHARGE CONTAINER (PDC)

Purpose: To safely discharge a pellet from an Air Rifle. A shooter may discharge their loaded rifle into the PDC after range time expires or if the shooter suspects there may be a pellet chambered in the rifle.

Items Needed: Metal can or small container such as a coffee can, shredded paper or rags, duct tape and yard stick.

Directions:

1. Remove the lid from a clean coffee can
2. Place the shredded paper or rags into the can until stuffed full
3. Place the lid back onto the coffee can
4. Duct tape the lid onto the coffee can
5. Place the yard stick along the side of the coffee can
6. Secure the yardstick with duct tape
