

## Summary of Changes – CMP 2023 Pistol Competition Rules

**2.6.9 c). National Trophy Residency.** A 2022 rule change allowed state NTT teams to include competitors from adjacent states that do not enter NTT teams in competition. This new change limits state NTT pistol teams to one such competitor.

**2.8.1. New Shooter Definition.** Starting in 2023, Civilian National Trophy Team members will now be permitted to retain new shooter eligibility for two years (formerly one year). This rule will not be retroactive to past new shooters except that a competitor who fired as a new shooter in 2022 will be eligible to fire as a new shooter one additional year and a competitor who fired as a new shooter prior to 2022 who has not fired in any subsequent National Trophy Team Matches in that event may fire as a new shooter one additional time.

**3.2.9. Spectators and Media.** A new rule encouraging the accommodation of spectators and media at competitions was added. It spells out limitations on their actions.

**3.12.3. CMP Pistol Achievement Awards.** Achievement Award cut scores for EIC Matches were revised based on 2022 National Matches pistol event scores. Score changes were minor.

**4.1.1 Service Pistols.** Former rules 4.1.1 through 4.1.4 were simplified into one rule. The listing of specific approved pistol models is eliminated. The new rule was rewritten to provide a simplified list of specific requirements for all Service Pistols. The pistol must be a semi-automatic pistol of a type that was designed for general military or law enforcement use. Any cartridge between 9x19 mm and .45 ACP is acceptable. Barrels are restricted to 5.5 inches in length, triggers must lift 4.0 lbs., sights must be open, grips must be suitable for right- or left-hand use and have no orthopedic features. Internal match conditioning modifications are permitted, provided they do not alter the functioning of standard safety features, except that magazine safeties may be disabled. Recoil reduction systems of any type are prohibited. Service Pistols may not exceed 45 ounces in total weight, with a magazine inserted. The intent of CMP Service Pistol rule changes that began in 2015 was to give competitors broad discretion in selecting pistols to use in CMP Service Pistol National Trophy and EIC Matches. The 2023 changes are designed to further fulfill that intent.

**4.1.2. 22 Rimfire Pistols.** The prohibition of recoil systems based on barrel venting, porting or “similar systems” was deleted.

**4.4. Pistol Ammunition.** The requirement to use “metal-jacketed or metal-plated bullets” in Service Pistol Matches was deleted. “Any safe ammunition” may now be used in any CMP pistol event.

**7.4.8 b. President’s/NTI Aggregate.** The MSG Aubrey Smith Trophy was added to be presented to the high Army new shooter.

**7.5.4 CMP National Match Pistol Any Sight Championship.** The Reiter Cup, named in honor of Steve Reiter, was added, to be presented to the Match Pistol Any Sight Champion.

**7.6 CMP National Match Pistol Team Events.** The T. D. Smith III Trophy, named in honor of T. D. Smith III, was added, to be presented to the winning 4-person team in the Match Pistol team aggregate.
